2. Claims 1 and 11 were amended. Claims 4-5, 12-13 and 17-30 were cancelled. Claims 1-3, 6-11 and 14-16 are pending.

Allowable Subject Matter

3. Claims 1-3, 6-11 and 14-16 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record Hamilton II et al. (US 6, 389, 539) discloses: A method and system for checking security when a request for system access is received by a computer system within a network environment is disclosed. When a request for system access into a network environment is first received, a service processor checks a fixed non-null pattern and based on its results performs a Cyclic Redundancy Check (CRC) on the contents of CMOS memory to verify its authenticity. However the prior art does not teach, or suggest: a first non-volatile data storage device, configured as a plurality of storage regions to store CMOS memory data, wherein the device lacks hardware security such that some of the CMOS memory data storage regions are modifiable by an application program on the system, each of the regions being protected by at least two software schemes including a set of one or more region level rules and another scheme selected from the group consisting of (1) mask bits, (2) checksum, (3) cyclic redundancy check, CRC, and (4) encryption; another, second non-volatile data storage

Art Unit: 2131

device to store a mirror image of the CMOS memory data in a locked location; a program store to store processor-readable instructions that implement each of the at least two software schemes to ascertain the validity of the CMOS memory data stored in the first non-volatile storage device on a region by region basis and, when data stored in any one of the storage regions is found to be invalid, replace the CMOS memory data in said one of the storage regions of the first non-volatile storage device with the stored mirror image of the data; and a processing unit coupled to the first and second non-volatile data storage devices and program store, to read and process the one or more instructions in the program store.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
